Experience

Dextel.net, Web Specialist

September 2021 - Present • Montréal, QC

- Participate in all stages of development on many projects at a time, across a variety of tech stacks.
- Act as the point of contact between clients and other developers, both delegating tasks and tackling them myself.
- Create wireframes for new projects and features to be implemented by other developers on the team.

Upscale Technology, Web Developer

August 2018 - February 2019 & - June 2019 - February 2020 • Montréal, QC

- Worked with React Native and Redux to help create and maintain Upscale Technology's flagship mobile application, Uptune.
- Worked in an Agile environment, creating and completing tasks with Jira and Git.
- Created and styled dynamic React and React Native components from UX wireframes.
- Implemented the current design of the Upscale Technology website.
- Created the web version and implemented new features for Uptune.

Keywords Studios, FQA Tester

March 2019 - June 2019 • Montréal, QC

- Communicated directly with game developers while finding and reporting bugs in their games, adhering to strict company guidelines on formatting when creating issues in Jira for developers.
